Work Experience

Front End Developer

Feb 2021 - Nov 2022

Nuvu Studios

- Serve as a web developer for this innovative Education company, helping create an in-house portfolio-based website allowing for the documentation of all student projects and work product.
- Gathered requirements and leveraged client, student, and partner feedback to model the website to specific user needs.
- Handled a diverse mix of website design and development responsibilities, as well as updating the site on an ongoing basis with new features, bug fixes, and improvements.
- Stack: Javascript, Ruby, Stimulus, HTML, CSS, JQuery, Tailwind

Oracle Discord Bot

bit.ly/DiscordEloBot

May 2020 - Present

- Identified faults in currently used “ratings” tracking chat bot on Magic the Gathering Discord Servers.
- Created agile and adaptive bot focused on maximizing user experience.
- Learned Node.JS, MongoDB and Discord.JS to begin groundwork for an open sourced project.
- After initial release, worked to create a second version to adhere to newly updated Discord.JS practices.

Playing With Power

Dec 2021 - Present

YouTube Channel

- Worked with this premiere MTG Content Creator and developed bi-weekly gameplay videos, podcasts and host tournaments for over 80,000 YouTube subscribers.
- Spearheaded Live Streaming presence. Created resources, booked guests and scheduled weekly streams for hundreds of viewers.
- Learned valuable script writing, team building and management skills.

Web Developer (Contract Role)

Nov 2020 - Feb 2021

Solar United Neighbors

- Worked with clients to update and create content on outdated website.
- Refactored and rebuilt existing structure into a more cohesive and updated format.
- Stack: HTML, CSS, Javascript, WordPress.
